INTRODUCTION

Leaders of India, Leading India

with GMV's Technology

65+ Years of Vertical Excellence

From Italy to India

GMV has been redefining the global elevator experience since **1958.** With innovation embedded in our DNA, we've powered over **1 million** lifts across **23+ countries.** Now in India, our journey continues through **advanced, green, and reliable** vertical mobility solutions.

SINCE 1958

About GMV India

Italian Precision, Indian Purpose

At GMV India,

We don't just import technology - we integrate purpose. Backed by over 65 years of Italian innovation, our Indian chapter is driven by a singular mission: to elevate how this nation lives, moves, and builds.

From urban villas to commercial hubs, our systems are tailored for India's architectural and lifestyle needs. Every lift we install blends the accuracy of Italian engineering with the intent to serve India's evolving spaces - efficiently and reliably.

About BRISK

Global by Engineering
Indian by Understanding

At Brisk,

We are not just a brand of elevators - we are GMV's GLO-CAL partner in India.

Founded in 2015, Brisk blends Italian engineering credibility with a deep understanding of Indian spaces. From luxury villas to compact urban homes, we adapt global innovation to fit local architectural realities, lifestyle needs, and cultural aspirations.

Every Brisk elevator is a product of this partnership where world-class systems meet Indian design sensibilities creating vertical mobility that is efficient, elegant, and enduring.

Milestones in India

Our Growing Impact Since 2020

500+ Lifts Sold Across India

250+ Units Exported to Global Market

16,000+ Lifts working with GMV Hydraulic System in India

Why Choose Us

- Certified to European (EN) Elevator Standards
- Trouble-free operation with long-term reliability
- Core Components Imported from Europe
- Very low operating and maintenance costs
- Powered by Proprietary GMV Controllers
- Adaptable to any non-Standard Shafts
- Unique designs offering high quality and safe solutions
- Ideal for senior citizens and persons with disabilities
- No Machine Room Required, saving more space
- User-friendly with easy and safe evacuation system

Global Footprint

GMV plants across the globe

GMV operates in **23+ countries** - combining local market insight with **global engineering standards.**

With manufacturing units over **10+ countries**, from Italy to India, and across Portugal, Germany, France, Spain, Sweden, Canada, Latin America, China, Poland, and Czech Republic

Each region benefits from **GMV's proven hydraulic and traction systems,** adapted to meet local architecture and regulatory needs.

Introducing GLT - MRL

Green Lift Traction (Machine Room -Less)

India's First Truly Roomless Traction Elevator

While others promise “roomless”’ we deliver it. The GLT MRL is the first traction elevator in India with a **zero-room footprint** — no machine room above, no pit room below.

Designed for modern buildings with space constraints, it redefines what a true MRL should be.

MRL - GMV TRACTION SYSTEM
OMEGA EVO SMART

GREEN LIFT TRACTION [GLT]

FEATURES

The GLT MRL isn’t just built to lift — it’s built to lead. Each feature is a leap in innovation, blending space-saving design, smooth performance, and future-ready technology into one seamless system.

1

No More Machine Room

ZeroRoom™ – 100% Machine Room Elimination

With ZeroRoom™, the GLT MRL system eliminates the need for a machine room altogether — not even a shallow overhead. Unlike conventional MRLs that still demand clearance above the shaft, ZeroRoom™ achieves a complete zero-room footprint.

This breakthrough gives architects, designers, and homeowners the freedom to reclaim valuable rooftop or indoor space without compromising functionality.

Why ZeroRoom™ Changes the Game:

- **True Space Liberation:** Zero machine room required unlike most MRLs.
- **Design-Friendly:** Seamlessly blends into modern architecture without rooftop obstructions.
- **Faster Installation:** Simplifies the construction and reduces civil work.
- **More Headroom, Less Hassle:** Maximizes cabin size without structural compromises.

Seamless terrace access without the burden of a machine room

No Compromise. Not Even in Failure.

TwinLock™ – Dual Braking System Like Nowhere Else

When lives are involved, one layer of safety isn't enough.

GMV's TwinLock™ introduces a new benchmark in vertical safety. This proprietary dual-brake configuration is not just an add-on — it's engineered as a built-in contingency system, working independently to ensure absolute stopping confidence. Whether in high-rise apartments or high-traffic commercial zones, TwinLock™ redefines what true backup means.

Why TwinLock™ Sets the Benchmark:

- **Redundant Safety Assurance:** Even if one brake fails, the second engages instantly.
- **High-Pressure Reliability:** Built for performance in power outages and overloads.
- **EN81-20/50 Compliant:** Aligned with globally recognized elevator safety norms.
- **Zero Guesswork, Maximum Trust:** Dual system leaves no room for mechanical doubt.

Noise-damped, Redundant
Dual circuit brake

Protection When Power Fails

GMVRescue+™: Serial-Based Emergency Device

GMVRescue+™ ensures passengers are never left stranded during a power outage. Its advanced serial-based system automatically returns the cabin to the nearest floor with absolute precision, even when the grid unexpectedly fails.

The system ensures passengers exit safely, making it especially reliable in India's frequent power fluctuations where uninterrupted evacuation is essential for peace of mind.

Why GMVRescue+™ Is Essential:

- **Unmatched Peace of Mind:** Automatically returns cabin to floor during power outage.
- **Battery Backup Powered:** Works independently of main power supply.
- **Safe Exit Always:** Doors open automatically, securely after landing.
- **Critical for India:** Ideal for regions with inconsistent electricity.

Save Energy. Shine Brighter.

BrightLite™ – LED Lighting with Standby Mode

BrightLite™ brings energy-efficient illumination to the GLT MRL with long-lasting LED panels and intelligent standby functionality. It is designed not only to brighten the cabin but also to deliver a smarter way of operating elevators.

Designed to reduce energy consumption by up to 75%, this lighting solution is both cost-effective and eco-conscious without sacrificing visibility or safety.

Why BrightLite™ Makes Sense:

- **Up to 75% Power Saving:** Smarter consumption, greener lift operation.
- **10x Longer Lifespan:** Reduces replacement needs & maintenance cycles.
- **Standby Mode:** Auto-dims intelligently when idle, smart on savings.
- **Eco-Friendly Upgrade:** Contributes by being a part of GMV's green initiative.

Power Saving

Precision in Every Move

IntelliLift™ – Advanced Levelling Control

With IntelliLift™, the GLT MRL delivers pinpoint floor alignment and a smoother ride. This smart VVVF control system continually adjusts the lift's acceleration, deceleration, and stop points to ensure butter-smooth landings and eliminate jerky transitions.

By eliminating uneven and jerky transitions, IntelliLift™ transforms vertical travel into a luxury experience by enhancing the comfort and safety of the users.

Why IntelliLift™ Delivers Precision:

- **Ultra-Smooth Stop:** NDAT absolute encoder ensures butter-smooth landings.
- **Isolated Platform:** No micro-shocks or uneven movement.
- **Consistent Every Ride:** Precision maintained over time.
- **Ideal for Villas:** Luxury meets silent operation in residential use.

Precise Positioning Technology

High Efficiency. Low Consumption.

EcoDrive™ – Energy-Saving Gearless Traction System

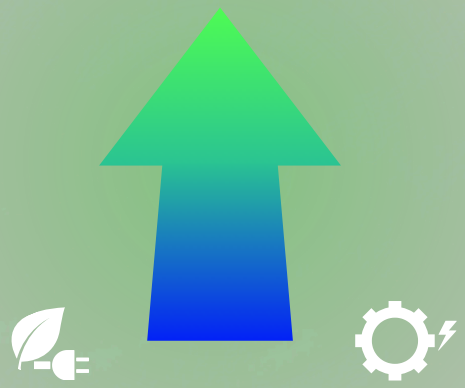

Powered by a gearless machine with high-efficiency permanent magnets, EcoDrive™ is designed to redefine how vertical transport should feel - smooth, silent, and sustainable.

This cutting-edge traction system eliminates the need for oil, reduces noise, minimizes heat, and drastically lowers energy consumption. With EcoDrive™, every ride becomes a statement of performance and environmental intelligence.

Why EcoDrive™ Wins Big:

- **Gearless + Magnetic:** Smooth, silent, and friction-free lift operation.
- **High Efficiency Motor:** Significantly lowers electricity bills & operating costs.
- **Zero Oil Required:** Cleaner, eco-friendly system that reduces maintenance work.
- **Great for Long-Term Use:** Reliability and sustainability designed to endure years.

High Efficiency

Low Consumption

Bigger Inside. Smaller Footprint.

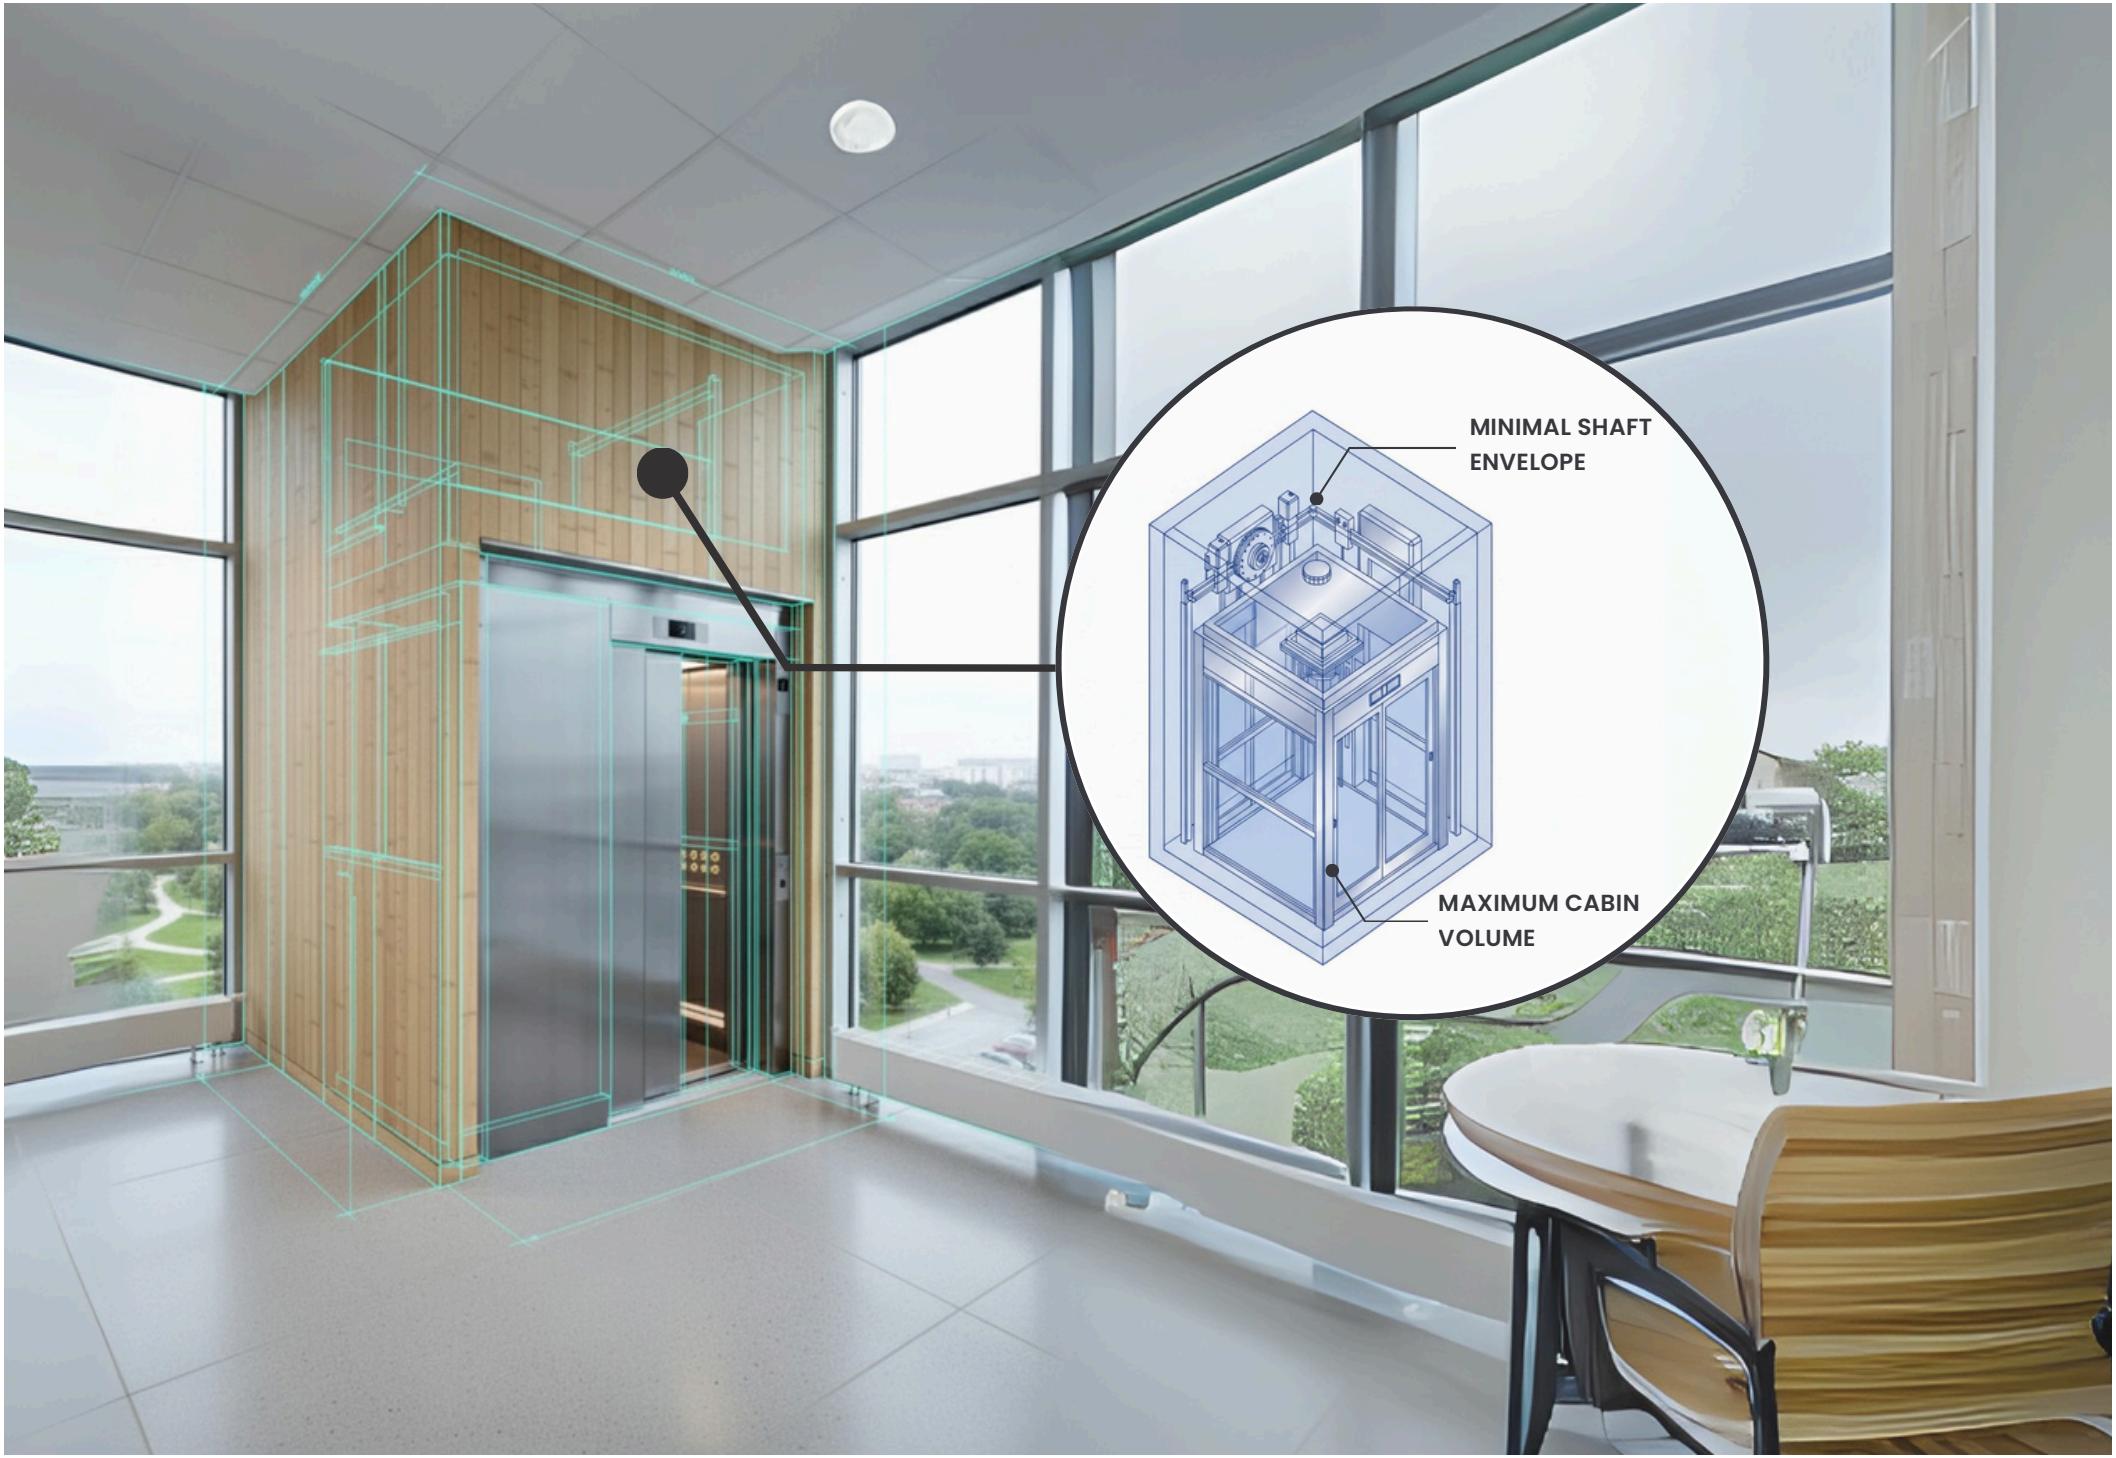

FlexiFit™ – Reduced Shaft, Maximum Cabin

FlexiFit™ redefines compact installation by making it possible to fit a larger and comfortable cabin inside a reduced shaft minimizing pit and headroom requirements, creating space efficiency without sacrificing safety or aesthetics.

It's a game-changer for renovations, tight spaces, and modern villas where structural modifications are a challenge. Fully compliant with EN 81.21, it makes premium elevator access possible without compromising design.

Why FlexiFit™ Fits Better:

- **Bigger Cabin, Smaller Shaft:** Maximizes comfort and usable interior space.
- **EN 81.21 Compliant:** Supports safe operation with reduced pit/headroom.
- **Seamless in Villas & Bungalows:** Preserves architectural harmony & style.
- **No Structural Hassle:** Reduces drilling, breaking, or heavy modifications needed.

Open. Transparent. Trusted.

Open Source Policy - Open Technology with 10-Year Warranty

GMV offers an extended warranty of up to 10 years, called GMV10/30. This warranty covers all system components, including those subject to wear. Uniquely, the warranty is renewable for up to 30 years, ensuring customers peace of mind throughout the full lifecycle of their elevator.

Also we use an unique CRM system to digitalize every service history and bringing entire transparency to our users.

Why Open Source Policy Builds Confidence:

- **Easy Access to Spares:** No monopoly on service.
- **Long-Term Cost Efficiency:** Enjoy transparent ownership, free from hidden costs.
- **10-Year Warranty Eligible:** Built to last, not just sold.
- **Lifecycle Coverage:** Warranty renewable up to 30 years, with guaranteed spare parts and support throughout the elevator's lifespan.

SAFETY

When safety is engineered, not assumed — every journey becomes effortless peace of mind. The GLT MRL is designed with next-gen protection systems that work silently in the background, watching, verifying, securing.

Next-Gen Safety, Built-In

2

CoreShield™

Bi-Directional Anti-Drift Safety System

The GLT MRL is equipped with a Bi-Directional Speed Governor integrated with car parking anti-drift. This ensures the lift stays firmly anchored when parked, reducing unintended movement and enhancing rider safety.

Dual Brake Redundancy System

The GLT MRL features a high-assurance dual brake system. Each unit works independently, forming a fail-safe that boosts safety in emergencies or heavy traffic, ensuring braking remains functional if one unit fails.

TwinLock™

RescueSmart™

Intelligent Emergency Return System

Every GLT MRL lift comes with an intelligent emergency return mechanism that brings the car to the nearest floor and opens the doors during a blackout. This system is essential for Indian power conditions.

Unintended Car Movement (UCM)

SafeMotion™ adds UCM protection to stop the cabin from moving when it shouldn't. During loading, unloading, or idle moments, it ensures the car stays locked, creating a secure environment for passengers of all ages.

SafeMotion™

Anti-Squeeze™

Gentle Doors. Safety for All

Eliminating the risk of fingers getting caught between doors. With pressure-control edges and soft-close mechanics, the system minimizes injury, making every ride safer for children and elderly passengers.

Always Watching. Always Protecting.

With 360-Safety™, the GLT MRL uses a sensor network around the cabin doors. Infrared and micro-beam detectors catch even the slightest obstruction from luggage to a child's hand, ensuring the doors never close on passengers.

360-Safety™

Certified Safety. Guaranteed Quality.

The GLT MRL blends Italian engineering finesse with practical innovation, delivering optimized power, precision, and environmental performance. Every specification is carefully crafted for efficiency, safety, and long-term reliability.

Tecnologia, Design e Sicurezza

CERTIFICATES & WARRANTY

Behind every promise of performance stands proof. The GLT MRL isn't just built to perform — it's certifies to excel. From EN81 compliances to extended warranties backed by open-source accessibility, our credibility is engineered into every circuit and screw

Certified to Outperform

3

Certified Safety. Guaranteed Quality.

Our GLT MRL system is not just advanced — it's certified to meet the highest global standards. Tested for performance, reliability, and endurance, every component is backed by international approvals and cutting-edge engineering.

Backed by Global Certifications:

EN 81-20/50:2014 – Elevator safety rules

EN 81-28:2016 – Remote alarm systems

EN 81-70:2005 – Accessibility for PwDs

EN 81-58:2018 – Fire-resistant lift doors

EN 81-21:2009 – Short-pit headroom lifts

EN 81-73:2016 – Fire emergency operation

EN 81-72 – Fire-fighters' lifts

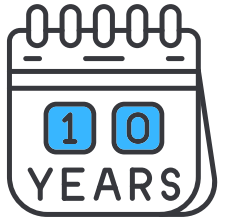

TÜV SÜD CA 563 – Rope certification

2014/33/EU – Lift directive

2014/30/EU – EMC directive

Elite Safety

GMV10/30™ – A 30-Year Promise

India's First 30 Year Comprehensive Warranty Program which Redefines Trust & Reliability

GMV sets a new global benchmark in reliability with GMV10/30™, the industry's most comprehensive warranty program. Unlike conventional warranties that only scratch the surface, GMV10/30™ covers every system component, including those subject to wear.

Built on decades of Italian engineering, rigorous testing, and proven durability, this program gives customers unmatched peace of mind: 10 years of complete coverage, with the option to renew for another 10 + 10 years, ensuring up to 30 years of guaranteed service and spare parts availability.

GMV10/30™ transforms the elevator from a purchase into a lifetime investment, keeping systems running smoothly while locking costs and minimizing downtime.

Why GMV10/30™ Redefines Warranty

- **30-Year Lifecycle Assurance:** Spare parts guaranteed for three decades.
- **Complete Coverage:** Includes even wear-and-tear components.
- **Zero Downtime Confidence:** Rapid replacement and remote assistance keep systems running.
- **Global Standard:** Aligns with the worldwide shift toward 10-year homeowner protection.

SPECS & DETAILS

Behind every promise of performance stands proof. The GLT MRL isn't just built to perform - it's certifies to excel. From EN81 compliances to extended warranties backed by open-source accessibility, our credibility is engineered into every circuit and screw.

Certified to Outperform

GLT MRL – Technical Specifications

Drive Traction	Drive Traction Machine Gearless
Description	MRL lift with machine on top fixed to the guides with ring-shaped frame (with return pulleys at the bottom) for single entrance and opposite double entrance and placed on the same axis of symmetry as those of the cabin. (GMV patent)
Available Payloads	350 to 1250 kg (Omega Evo Classic) and 350 to 630 kg (Omega Evo Extra Slim).
Drive Pulleys	120 mm diameter, 6.5 mm polyurethane-coated steel ropes.
Counterweight	Concrete/Steel-filled side counterweight alongside car guide (GMV patented decentralized system).
Machine Room	Not required
Intended Use	Residential, offices, hotels, hospitals, shops, public & private buildings.
Safety Components	Bidirectional progressive grip safety gear, A3 overspeed governor with car parking anti-drift.
Electric Components	WWF variable frequency control, collective descent/ascent maneuver, hospital/fireman modes, UPS rescue with door reopening, GSM telemetry (optional), EN 81.28 dialer
Shaft Type	Concrete/Steel structure
Fire Safety	Resistance up to 120 minutes.
